SUMMARY

Computer Science student at Barrett Honors College with hands-on experience building and shipping agentic AI products, from user research and PRDs to deploying RAG pipelines, seeking APM internship roles for Summer 2027.

EDUCATION

B.S. Computer Science, Barrett Honors Scholar, Dean's List Anticipated May 2028
Arizona State University **4.0 GPA**
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design, Computer Organization & Assembly
Guilford College, Honors Program, Dean's List (Transfer), 4.0 GPA Aug 2024 - May 2025

TECHNICAL SKILLS

Technical: Java, Python, C/C++, JavaScript, SQL, HTML, CSS, Azure, PostgreSQL, Git.

AI & Product RAG pipelines, LangChain, Gemini API, Prompt Engineering, Vector Embeddings, Adaptive AI Workflows.

Product & Research: PRDs, competitive analysis, user research & surveys, product metrics (PostHog), KPI Tracking, Human-AI Interaction, Competitive Benchmarking.

RELEVANT PROJECTS (Portfolio: <https://sharini55.github.io/>)

AI Study Buddy, Personal Project (Python, PostgreSQL, Azure, Gemini API, LangChain) Jan 2026 - Present
App Link: <http://aistudybuddy-beayhugda7b2ghad.eastus-01.azurewebsites.net>

- Wrote a formal PRD defining success metrics, user personas, and feature scope; conducted competitive teardowns of Notion AI and Quizlet to validate product differentiation.
- Built an autonomous study agent leveraging a Gemini API & LangChain RAG pipeline (vector embeddings) that perceives user weak areas from quiz history, decides targets without manual input, and adapts content via a full perceive-decide-act-adapt loop.
- Architected tenant-isolated data schemas to enforce user privacy, aligning with responsible AI product design principles.
- Shipped platform to address exam prep friction and instrumented product analytics (PostHog) to track usage KPIs, iterating with 6 active users via direct feedback loops to drive prioritized feature decisions and UX improvements.

To-do App, Personal Project (Java, Spring Boot, Azure) Jan 2026 - Present
App Link: <http://todoapp-a7a8f7f3djb7h8b8.eastus-01.azurewebsites.net>

- Architected and deployed a full-stack task management platform on Azure, building a MockMvc integration test suite covering CRUD operations, error handling, and a 100-task stress test.

FSE AR/VR EPICS Project, Class Project Jan 2026 - May 2026

- Defined project requirements by running 3 rounds of student surveys and partnering directly with FSE 100 course faculty as project stakeholder, working with 30 Honeywell-donated headsets.
- Conducted a competitive analysis benchmarking 6 alternatives, VR platforms, online course tools, video tutorials, against cost, implementation ease, and engagement to validate product direction.
- Collaborated across a 10-person cross-functional team; redirected project scope after technical discovery, presenting key findings and strategic product recommendations to FSE 100 faculty stakeholders.

RELEVANT WORK EXPERIENCE

Lab Teaching Assistant (CHM116), Arizona State University Aug 2025 - Dec 2025

- Co-led weekly labs for 48 students; engineered AI-generated grading checklists that reduced grading time by 30%.

Intern, Office of Student Leadership & Engagement (OSLE), Guilford College Oct 2024 - May 2025

- Tracked and analyzed weekly social media analytics, optimizing content strategy to boost engagement by 25%.

ACTIVITIES

Software Developers Association | Active Member Aug 2025 - Present

- Participate in technical workshops focused on algorithmic problem-solving and software engineering practices.

Toastmasters, ASU Chapter | Active Member June 2026 - Present

- Practicing public speaking and professional communication in weekly sessions.
